# Basic Concept/List

- Concept
    - Whisk.y - Match users with their ideal Whisky's (Single malt) based on their preferences.
- The service will allow a user to make an account and set preferences for flavor (peat, malt, dryness, spice) and then match their preferences to matching Single Malt Whisky. The location of the Scottish brewery will be displayed on a map (?and information about the brewery (history) will be given?). Whisky, Scottish and Irish bars will be displayed in their area. In addition the yummly API will be used to show relevant cocktail recipes for their Whisky.
- Use draw.io to put a graphical wire from concept together.
